

## Model QDF-6 thermo-anemometer (hot ball)

- Telescoping probe is ideal for measuring in HVAC ducts and other small vents; extends up to 1m long.
- Data hold to freeze the displayed value.
- Four digital LCD display
- Measure range: 0.05~30 m/s
- 5-6V rechargeable battery operated
- High resolution of 0.01m/s
- Basic accuracy:  $\leq 3\%$  full scale
- Dimension: 190×90×40 (mm)
- Working environment:  
temperature:  $-10\sim 40^{\circ}\text{C}$ , humidity:  
 $\leq 85\%RH$ , air pressure: 970 ~  
1040hPa
- Weight: 380g
